- UAE** لا تقطع الأشياء الصلبة أو الأشياء التي يتطاير منها شظايا!

The machine is designed for cutting stacks of paper to a specified size.

This machine is constructed for "one-man operation" only!

⚠ **Warning!** Clips or similar damage the cutting blade.

Disconnect from the mains before starting any service work or before removing the panels!

Replacement of blade and cutting stick may be performed only when the main switch is switched off!

IDEAL 7228-06 LT

All components which may endanger the operator are covered by a guard (**A**).

Do not operate the machine without the following safety devices:

- Panels, tightly screwed (**A**).
- Safety beam guard (**B**).

The cutting action, which is dangerous to the operator, is protected by a two-handed control system (**C**) and safety beam guard (**D**).

Protect mains cable against heat, oil and sharp edges!

Standard machines are factory-set as follows:

- Voltage 400 V (220 V) 3 phase
- Frequency 50 Hz (60 Hz).

Machine does not function

- Is the machine ⑤ switched on?
- Is the key-switch ④ on.
- Is the green overload switch ②⑦ pressed?
- Is the black overload switch ②⑧ pressed?
- Check on-site fuse.

If the machine still does not function then the rotation must be reversed.

The machine is wired according to the IEC standards. We recommend that alterations to the rotary direction be made in the socket. It is also possible to make alterations in the plug by exchanging "L1" and "L2".

⚠ Danger!

Incorrect exchanging of the connections will endanger the operator.

This work must be carried out by an electrician.

IDEAL 7228-06 LT

Ensure free access to mains!

When not in use for a longer period switch off.
(Main switch to "0").

The machine is delivered ready for operation. 6 strong people are required to lift the machine from the pallet.

Side tables, left and right, (A) are available as accessories.

Attach the side tables to the front table so that the upper surface is level.

(Screws and nuts are in a plastic bag in the tool set (B)).

Reassemble the safety light beam.

For transport through narrow doors:

- Remove side tables

⚠ Danger!

The machine must not be put into operation without the safety light beam.

Assemble the side tables.

Remove the light beam. (1. - 3.)

Screw on the side tables and light beam (4. - 6.).

IDEAL 7228-06 LT

Plug into socket.

It is forbidden to operate the machine if the operating and safety instructions have not been understood. Please check the safety devices are functioning and complete before use.

- All covers have to be mounted (A).
- Safety beam guard must be mounted (B).
- The release for cutting is allowed only if the two-hand safety device is operated at the same time (C)

• **Safety light beam:**

The machine stops immediately if anyone reaches into the cutting area (D).

We recommend you keep a record of your test results.

IDEAL 7228-06 LT

Position the main switch to "I" (A). Insert the key for the control system and turn it to the right (B).

Press  button (D) machine will automatically go to 72 cm or 28,346 inches.

The machine is now ready for use.

The measurement is set as follows:

- manually with the electric hand-wheel (17) or button (16) and (18)
- by programming the cutting dimensions (A). Dimension is shown on the display in inches or cm (B).

Optical cutting line indicator:

Optical cutting red line (A), indicates the position of the cut. Blade cuts on the front edge (B) of the light beam.

Mechanical cutting line indicator:

The clamp (C) can be used as cutting line indicator for cutting. Pre-clamping can be performed using the foot pedal (D).

Only use the optical cutting line indicator and mechanical cutting line indicator when no exact cut is required.

Position the paper on the backgauge (A) and side lays left or right (B).

To move paper stacks, please use the paper knock-up block (C) provided.

(Run backgauge to the front for turning the paper stack).

IDEAL 7228-06 LT

False clamp plate:

A clamp plate (A) is fitted to the machine to prevent pressure marks on sensitive material. LED (22) illuminates.

To dismantle:

- Remove the clamp plate (A) by turning the screwdriver (found in tool box) in the space between the clamp and clamp plate.
- Store the clamp plate in the provided holder (C) LED (22) deletes.
→ The remaining cut, without false clamp, is 20 mm

⚠ Warning!

Make sure the false clamp is in the provided holder otherwise the measurement from 20 mm - 89 mm cannot be cut.

To mount:

- The clamp plate (A) is inserted to the top into the clamp (D).
→ The remaining cut, with false clamp, is 90 mm

Airtable:

It is easier to position large stacks of paper when the airtable (9) is switched on.

Setting clamping pressure:

The clamp pressure can be adjusted using the adjustment knob (7). The clamping pressure can be read on the light panel (19).

The clamp moves automatically when cutting is activated.
The paper can be pressed in advance, with the foot pedal.
Cutting is activated by pressing both buttons (A) on the front table.

Symbols for cutting activation:

Cutting sequence with automatic clamping.

Cutting activation:

Press both buttons of the two-handed control system (A) simultaneously and keep them pressed until the paper is completely cut.
The safety area (B) must be free.

To interrupt or stop cutting:

To interrupt or stop cutting, release both buttons (A) of the two-hand control.

IDEAL 7228-06 LT

Operating elements

- ① - Safety two-handed control system pre-clamping and cutting
- ② - Backgauge control
- ③ - Backgauge
- ④ - Key switch
- ⑤ - Main switch
- ⑥ - Side lay left and right
- ⑦ - Clamp pressure adjustment
- ⑧ - Foot pedal
- ⑨ - Airtable switch
- ⑩ - Program number
- ⑪ - Program step
- ⑫ - LED "M" display memory
- ⑬ - LED "E" display eject
- ⑭ - LED "S" display error indication
- ⑮ - Display cutting size (cm or inch)
- ⑯ - Backgauge, backwards fast
- ⑰ - Electronical hand-wheel for fine adjustment
- ⑱ - Backgauge, forwards fast
- ⑲ - Clamp pressure
- ⑳ - Keypad
- ㉑ - Basic setting [F1], [F2], [F3], [E] (eject)
- ㉒ - Display false clamp plate
- ㉓ - Keypad with calculator
- ㉔ - Display impuls of backgauge movement
- ㉕ - Display in cm or inch
- ㉖ - Changeover cm-inch
- ㉗ - Calculating button
- ㉘ - Paper knock-up block
- ㉙ - USB connection port

Start machine

- Main switch ⑤ to position "I", insert the key ④ for the control panel and turn it to the right.
- Press **Start** button → backgauge ③ moves to the rear and searches for the reference position, wait until a measurement is shown in the display ⑮ (72 cm or 28,346 inches).

⚠ Warning!

Before storing or cutting a measurement please check if the correct measurement scale (72 cm or 28,346 inches) see above is stored. For information on how to store see bottom picture on page 24.

Cutting to specified dimensions

- Enter dimension on the numerical key pad ②③ → LED "S" ⑭ appears.
- Press **Start** button → dimension is approached, → LED "S" disappears.
- Insert paper and move by means of the paper knock-up block to the backgauge ⑨ and side lay on the left ⑩.
- Release the cut.

Calculating

A measurement can be calculated with button ⑳. E.g. 20 - 2 **Start** and the backgauge advances immediately to 18.

Cut according to markings

- Adjust the backgauge with button ⑩ to the back. (The backgauge will return quicker).
- Insert paper and move by means of the stacking angle to the backgauge ③ and side lay on the left ⑥.
- Turn the hand-wheel ⑦ to the front until the marking on the paper to be cut is under the cutting line indicator.
- The more the hand-wheel ⑦ is turned the faster, the backgauge will move. For fast mode use key ⑱.
- Release the cut.

IDEAL 7228-06 LT

Eject function

If button **[E]** ②① is pressed the backgauge will advance to the preset measurement, ejecting the material to be cut, then automatically return to the position shown on the display.

Adjust the eject-dimension

- Press **[P]** and hold + press **[E]**
→ **E J** on display.
- Insert the desired dimension.
- **[=]** Store dimension.

Multiple cut

- Enter the multiple cut size on the display ②③.
- Advance to the measurement with the **[Start]** button.
- Push the paper to the backgauge ③.
- Release the cut.
- Press **[AM]** button → "A" on the display ①①
- Enter the multiple cut size.
- Press **[Start]** button → backgauge will advance by the multiple cut size.
- After cutting the backgauge will advance by the multiple cut size.
- Pressing the **[Stop]** button shows the actual size.

If, when inserting the multiple cut size, the **[M]** button is pressed instead of the **[AM]** the LED "M" ⑫

⑫ will light and after every cut the **[Start]** button must be pressed.

Exiting program-mode

- Press **[M]** button → LED "M" ⑫ is cleared on the display. The actual size is shown.

Cutting activation

⚠ Warning!

- Run backgauge to the front for turning the paper stack.
 - Do not interrupt the upward movement of the blade by performing switching procedures.
 - Release blade only when LED "S" ⑭ has gone out.
 - The safety area must be free.
 - Blade must always be at the top and be covered by the clamp. Do not touch the blade
- ⚠ risk of injury!**

Programming

This control system enables you to store 99 programs with 99 programmable steps. One step represents one measurement or max. 9 multiple cuts. After entering the program numbers you are able to change between several program steps with the button ▲ and ▼.

Program on display ⑩ = program number.
Step on display ⑪ = program step.

The indicated program step can be overwritten at any time. These programs remain stored when the machine is off. Should you change to another dimension unit all programmed measurements are converted into the new unit (cm or inch).

Operating elements

- P - Program number
- S - Program step
- M - Memory (multiple cut)
- AM - Memory (multiple cut with automatic control after the cut))
- ▲ - Program up
- ▼ - Program down
- C - Clear
- D - Delete
- I - Insert
- E - Eject
- CP - Clear Program
- Stop - Stop
- Start - Start
- cm
•
inch - Display cm or inch

IDEAL 7228-06 LT

Entering a program

- Press **P** → **PR** appears on the display.
- Enter program number **0 1 ... 9 9**.
The number will be shown on the display ⑩
- If measurement is shown on the display ⑮ the program is reserved.
- Enter a measurement or advance with the hand-wheel ⑰.
- **=** Store the dimension → next program step appears.
- Enter the next dimension.
- **=** Store the dimension
- **P** + **Stop** Escape the program mode.

Eject function program

- The eject function can be added each time a measurement is entered and ejects before advancing to the next measurement.
- Enter the next dimension.
- Press **E** → LED "E" appears.
- **=** Store the dimension.

Example of a program eject function

- **P 0 8** program 08
- **CP CP** delete previous program
- **2 7 =** step 1 on 27,0 cm
- **1 9** step 2 on 19,0 cm
- **E =** eject
- **P Stop** escape the program mode

How the example works

- **P 0 8** start program 08
- **Start** proceeds to position
- Insert paper
- Release cut 1
- Release cut 2
- Paper is ejected
- **P Stop** escape the program mode

Multiple cut program

- Press **AM** until the multiple cut size is reached (n !, n^2 usw. max. 9 mal).
- Enter multiple cut size.
- **=** Store the dimension.

Example of a program with multiple cut

- **P** 0 9 program 09
- **CP** CP delete previous program
- **5** 0 = step 1 on 50 cm
- **AM** first multiple cut size n !
- **AM** second multiple cut size n^2
- **2** = e.g. multiple size 2 cm
- **P** Stop escape the program mode

How the example works

- **P** 0 9 start program 09
- **Start** proceeds to position 50 cm
- Insert paper
- Release cut 1
- Release cut 2 cuts multiple size 2 cm
- Release cut 3 cuts multiple size 2 cm
- Backgauge proceeds to position 50 cm
- **P** Stop escape the program mode

Changing select program

The **S** button is used to select a program step quickly and change a dimension.

- Press **P** → **PR** appears on the display.
- Enter desired program number 0 1 ... 9 9.
- Press **S**.
- Enter program step to be changed 0 1 ... 3 6
- Change dimension.
- **=** Store the dimension.

A program step can also be selected using the **▲** or **▼** button.

- Overwrite dimension.
- **=** Store the dimension.

Insert a step

The inserted program step will appear before the step shown in the display.

- Choose a step number with button **▲** or **▼**
- Press button **1**.
- Enter dimension.
- **=** Store the dimension.

IDEAL 7228-06 LT

Delete a step

- Choose a step number with button ▲ or ▼
- Press button **D** twice.

Delete a program

- Enter program number **0 1 ... 9 9**.
- Press button **CP** twice.

Changing the basic settings

Frequently used dimensions are stored in the control system.

- **F1** Basic setting 21 cm (8,267").
- **F2** Basic setting 14,85 cm (5,846").
- **F3** Basic setting 10,50 cm (4,133").
- **E** (Eject) Basic setting 20 cm (7,87").

Changing a basic setting:

- Press **P** and hold + press **F1**
→ Setting blinks.
- Enter new setting.
= Store the dimension.

Basic settings

Display in cm or inch

- Press **cm** (A) → display changes between cm and inch. The corresponding LED light will be on.

Display brightness

- Press **cm** and hold + press **D**.
→ display changes between light and dark.

Cutting counter

- Press **cm** and hold and press **S**.
→ number of cuts are shown.
- Press **D** twice to delete the number of cuts.
- Press **Stop** to escape the cutting counter.

Working with programs

- Press **[P]** → *PR* appears on the display.
- **[0]** **[1]** ... **[9]** **[9]** Enter program number.
- Press **[Start]** button → dimension is approached.
- Insert paper and move by means of the paper knock-up block **(28)** to the backgauge **(9)** and side lay on the left **(10)**.
- Release the cut → after every cut the backgauge advances to the next position. Release a cut see page 17.

Correcting a measurement

When a dimension has to be corrected during cutting (e.g. program step 03) advance to the new cutting position with the rotary control ⑰ or enter the new dimension on the keypad ㉓.

 press, new measurement is stored

Press  advances to the correct dimension

Cutting is activated and the correct measurement is cut.

Attention: the correct dimension is now stored in the program

With the button  and  you are able to change between several program steps. With  the backgauge moves to the indicated dimension.

With  the backgauge stops.

General

LED "S" on → specified dimension not achieved.

LED "S" is off → specified dimension achieved.

Exiting program-mode

Press **P** → **PR** appears on the display.

Press

Escape the program mode.

IDEAL 7228-06 LT

If the cutting quality decreases:

- Check the cutting depth (see page 34).
- Check the cutting stick (see page 30).
- Replace or grind the blade (see page 26 - 34).

The blade cannot be ground if the blade height is less than 83 mm/3,29 inches.

A new blade must be used.

The blade may only be ground by a qualified supplier or from the manufacturer
Krug & Priester, D-72336 Balingen.

⚠ Danger! Risk of injury!

The blade is extremely sharp. Do not extract the blade or transport it without the changing tool. Changing the blade may only be performed by trained staff.

Turn the blade depth adjustment (A) towards the top until the blade screw recess corresponds with the frame recess (B). (Spanner found in tool set (C)).

Remove spanner

⚠ Danger! Risk of injury

Lower the blade by pressing both cutting buttons (1.). Keep one button pressed and turn off the main switch (2.).

IDEAL 7228-06 LT

The 3 eccentrics are now exposed and should be turned counter clockwise to position "0" with the special wrench and attachable extension pipe (A) (in the tool set). The slot must correspond to position "0" (B).

Remove the special wrench and turn on the main switch until the blade returns to the home position.

Position the main switch to "0" (1.)
Remove the 2 blade screws on the elongated holes (2.). Then put the blade changing tool (A) into place and fasten it to the blade (3.).

Remove 4 blade screws (1.)
Loosen the grips (2.) of the blade changing tool (A) lightly and allow the blade to be taken downwards out of the machine (3.). Place the blade into the blade carrier (B) and screw it into place (4.).

IDEAL 7228-06 LT

Take out the cutting stick with a small screw-driver. If needed the cutting stick can be turned or exchanged. (The cutting stick can be used eight times).

Replacing the cutting stick (not the blade)

- Turn the blade depth adjustment (A) towards the top until the blade screw recess corresponds with the frame recess. See page 27. (Otherwise the first cut will be too deep).
- **Remove spanner**
- Remove the cutting stick according to top picture.
- Turn the cutting stick (the non-used side must be near to the blade) and plug it into the left holding bolt.

⚠ **Danger!** Risk of injury!

Cutting test after replacing the cutting stick (not the blade)

- Insert the paper and release the cut.
- If the last sheet of paper is not cut along the entire length turn the blade depth adjusting screw (A) 1/12 downwards using a spanner.
- If the last sheet is still not completely cut repeat this process until the last sheet is cut along the entire length.

Take the exchange blade carefully out of the blade box and screw it to the blade changing tool (A)

- Make sure there is a space of 10 mm or 0.39 inches! (B).
- Blade must be covered! (C).

⚠ **Danger!** Risk of injury!

Place the blade to be exchanged with the blade changing tool (A) mounted (1.), into the blade carrier and push it up to the top and screw it into place with the grips (2.).

IDEAL 7228-06 LT

Lightly tighten 4 of the 6 blade screws with washers (1.). Remove the blade changing tool (A) (2.). Lightly tighten the remaining blade screws with washers (3.).

Remove all tools and distribute paper along the entire cutting length (1.). Turn main switch to position "I" (2.).

Lower the blade by pressing both cutting buttons (1.). Keep one button pressed and turn off the main switch (2.).

With the special wrench (A) the 3 eccentrics should be screwed down until the paper is cut along the entire length of the blade (3.) (The blade must remain parallel, not too deep into cutting stick).

IDEAL 7228-06 LT

Turn main switch to position "I" (1.). Blade will return to upper position. Tighten 6 blade screws (2.) firmly.

Paper cutting test. If the last sheet or several sheets are not completely cut, gradually turn the blade depth adjustment (A) 1/12 downwards until all the paper is completely cut. Do not set too low as blade will become blunt sooner.

⚠ Danger!

- Maintenance work may only be performed by trained staff.
- Disconnect the mains before starting any service work or before removing the cover.

Grease the backgauge (A) control weekly with a grease gun. Advance the backgauge as far as possible to the front. (Use non-resinous oil or grease).

IDEAL 7228-06 LT

Grease the remaining parts twice a year (see picture).

The main switch must be on "0" (B).

Disconnect from the mains.

Remove the front upper housing (E) → taking care of the cable.

Remove lower panel and rear wooden panel (C). Tools in tool set.

- Check oil (F). If oil is below minimum contact your dealer.
- Remove any paper.

- Grease the machine.

- Check the 4 joining bolts and 2 pushing bars for wear (D). If necessary inform your service personnel.

- Mount the machine.

Maintenance work must be carried out on the machine every 5 hours.

Safety test

The safety regulations are according to the regulations of the country where the cutting machine is operated. The manufacturer recommends a safety check is made every 5 years by an authorised service team.

Machine does not function!

Is the machine plugged in?

Main switch to position "I"? **(A)**
Control system activated? **(B)**
(Turn key to the right)
Check the units fuse and the on-site circuit breaker!
Release a cut see page 17.

IDEAL 7228-06 LT

The machine does not function after being moved to another position.

If the machine still does not function then the rotation must be reversed.
The machine is wired according to the IEC standards. We recommend that alterations to the rotary direction be made in the socket. It is also possible to make alterations in the plug by exchanging "L1" and "L2".

⚠ Danger!

Incorrect exchanging of the connections will endanger the operator.

This work must be carried out by an electrician.

Cut cannot be activated.

- **Safety light beam is interrupted /dirty.**
Remove all items obstructing the safety area (A) and clean the glass from the sender (B) and receiver (B).
- **Measurement has not been reached correctly.**
→ LED "S" ⑭ does not turn off.
Push the button again.
- **Measurement below 9 cm.**
The false clamp plate must not be mounted.
Remove the false clamp plate and store it in the **provided holder** (see page 16).

Machine turns off:

- **Machine overloaded.**
Safety button (A) ejects.
Reset the safety button (A).
- **Machine blocked.**
- **Blade is blunt.**
Eliminate the cause, and push the safety button (A).
- **Backgauge blocked**
Safety button (B) ejects.
Eliminate the cause, and push the safety button (B).

Safety button for:

A = Blade drive

B = Backgauge drive

IDEAL 7228-06 LT

A

Does not cut through the last sheet:

- Turn or turn around the cutting stick (**A**), readjust the blade by means of blade depth adjustment (**B**) (see page 34).

Poor cutting quality or blade stays in the paper stack.

- Change the blade (**C**) (see pages 26 - 34).

B

C

Motor runs but blade does not move downwards.

- Security brake has been activated!
Inform the Service Team!
- www.ideal.de → "Service"
service@krug-priester.com

Display illumination off

- Is the machine plugged in? (A)
- Is the main switch on position "I"? (B)
- Push in the green safety button! (C)
- Check the units fuse and the on-site circuit breaker!

IDEAL 7228-06 LT

No clamp pressure.

- Hydraulic oil needs refilling.
- Contact your dealer.**

Trouble shooting-light beam

- During normal operation the LED (A) must illuminate orange and LED (B) green.
- Display (C) is permanently on orange when the sender and/or receiver require cleaning.
- Clean the glass (D) from the sender and receiver.**

None of the above mentioned methods helped to solve the problem:

Technical data:

- Power supply: 400V/50Hz/3~, 220V/60Hz/3~
- Cutting length: 720 mm
- Cutting height: 80 mm
- Table depth: 720 mm
- Sound level EN 13023: 72 dB (A)
- Minimum space requirement (width x depth x height)
1305/2100¹mm x 1500/1600¹mm x 1355 mm
- Leakage current < 3,5mA
- Power cord gauge min. 1,5mm² (400V)
- Power cord gauge AWG 14 (20A) (220V)
- Clamping pressure: min. 250 daN,
max 2000 daN
- Weight: 613 kg, 620 kg¹
- Capacity of hydraulic oil: 1,5 l
HLPD, viscosity 46 mm²/ sec. to DIN 51562.
Used oil must be disposed of at the
authorised place.

¹ with side tables

The exact technical specifications can be found on the technical specifications sticker (**A**) on the machine. A wiring diagram is found in the electrical switch box.

To claim under guarantee, the machine must still carry its original identification label.

Safety light beam

- Total reaction time: 101 ms
- Resolution 14 mm/minimum distance: 370 mm
- Resolution 30 mm/minimum distance: 480 mm
- Resolution 40 mm/minimum distance: 468 mm

Ambient operating temperature 10 °C - 60 °C
Air humidity (not condensating) 15 % - 95 %

IDEAL 7228-06 LT

This machine is approved by independent safety laboratories and is in compliance with the EC-regulations 2006/42/EG and 2004/108/EG.

Sound level information:

The sound level is 72 db (A) as defined by EN 13023.

Subject to alteration without notice.
